

AVATARS

The team engages in an event titled "Avatars," where they embark on various activities. They begin by sending photos of places or beings that connect them with nature, setting the mood. Teams then create their avatars inspired by the values of the Avatar series, using makeup and accessories. Next, they design eco villages using natural and recycled materials and participate in a unique sushi fishing challenge. Following this, they synchronize their heartbeats to create harmonious melodies and compete in archery. Finally, they created a "Tree of Voices" manifesto, recording lessons learned from the experience for future generations.
